

Naan Mudhalvan  
Salesforce Developer(Course)  
Assignment no 1

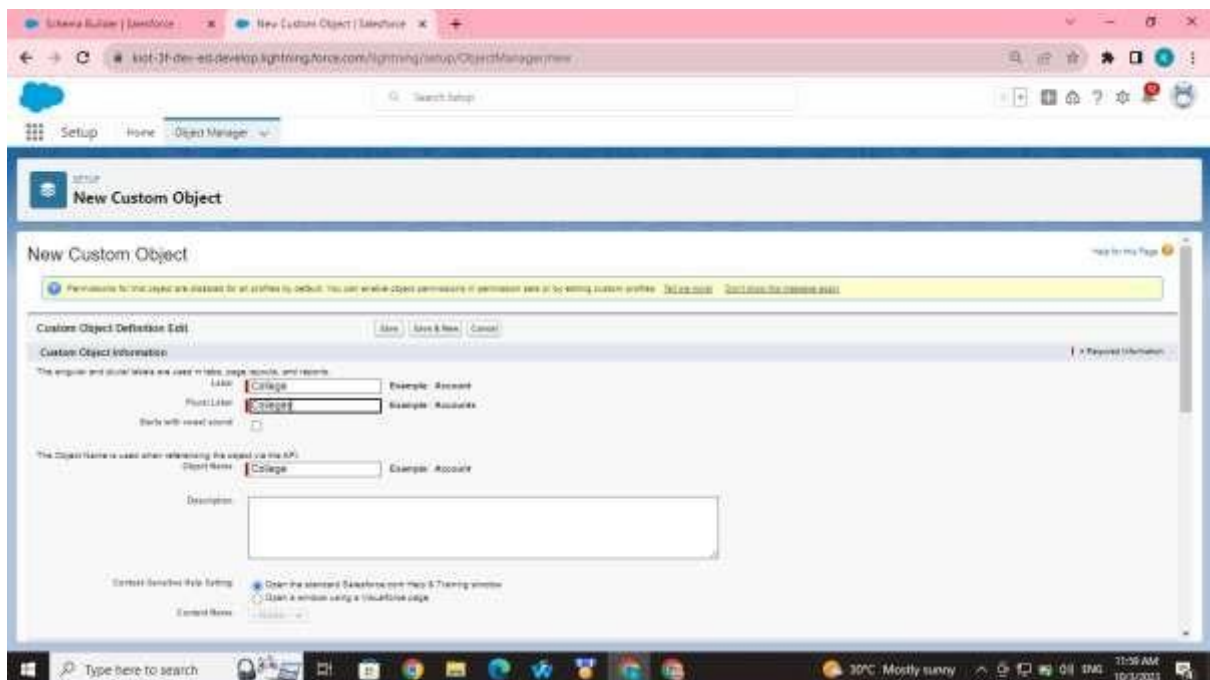

Name :Ilancheran R  
Naan Mudhalvan id : au611220205304  
Year & Dep : 4<sup>th</sup> year & IT  
Batch : 2024  
Zone no : Zone 8

1. Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

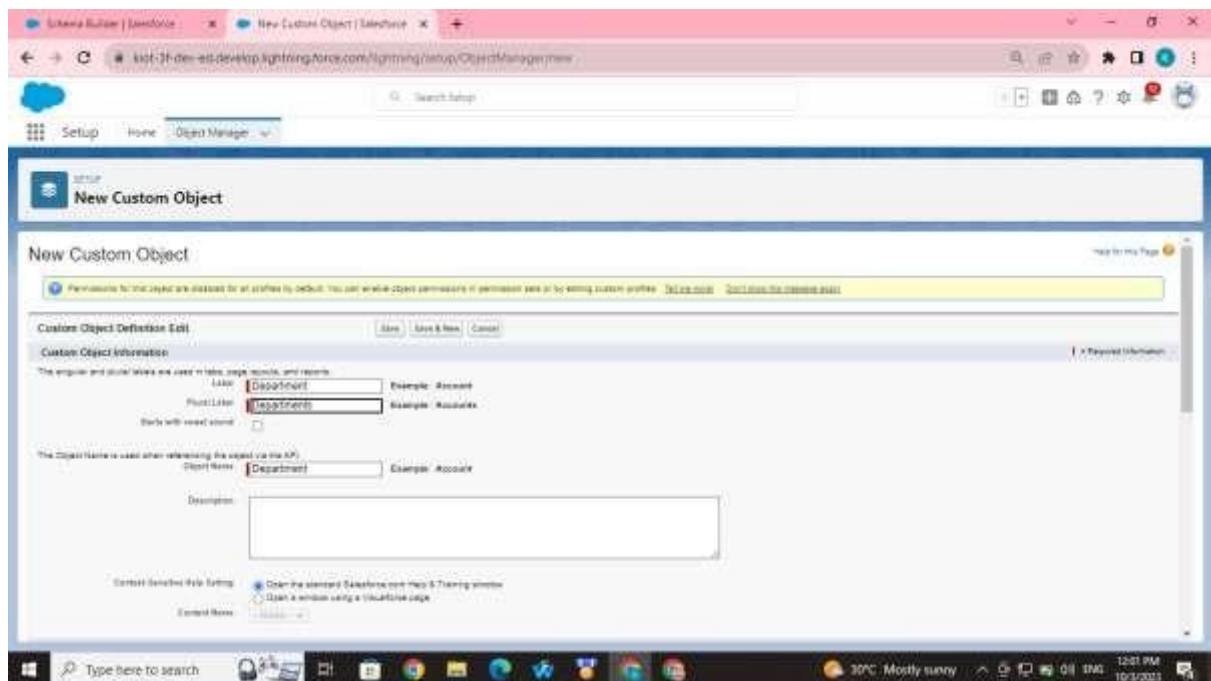

Solution:

### Step 1: Create Custom Objects

Assuming you have two custom objects, let's call them "College" and "Department". If you haven't already created these objects, you can do so by going to Setup > Object Manager > Create > Custom Object.

Second custom objects, let's call them  
"Department"

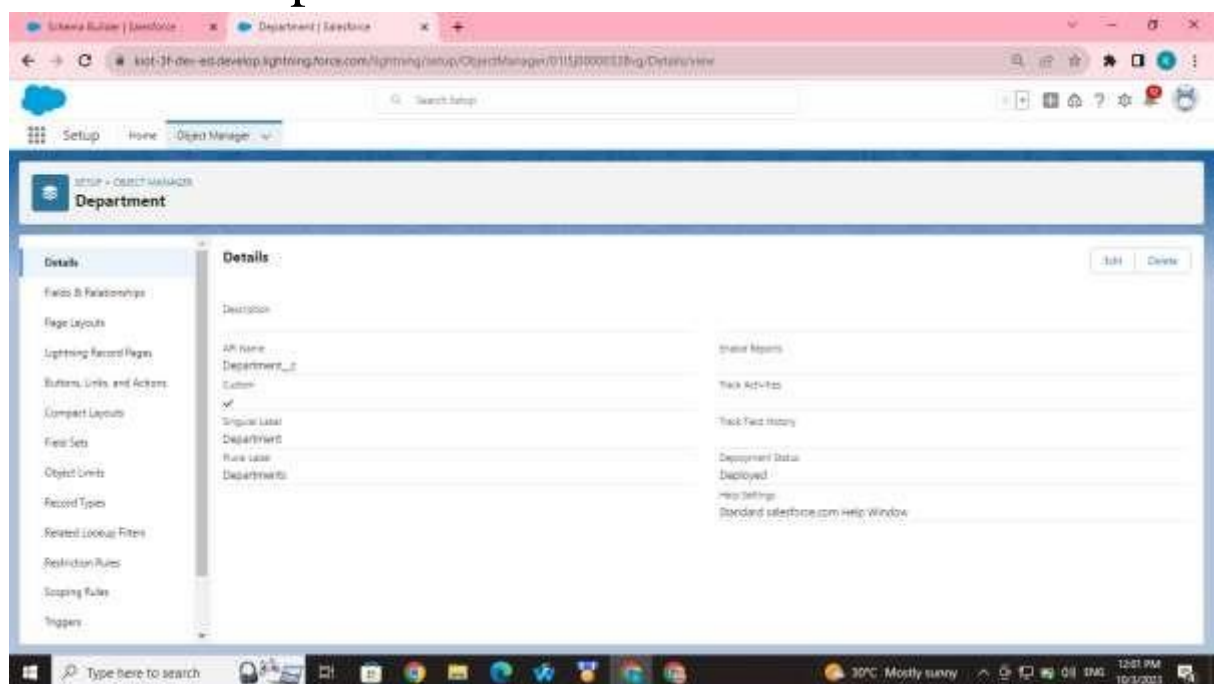

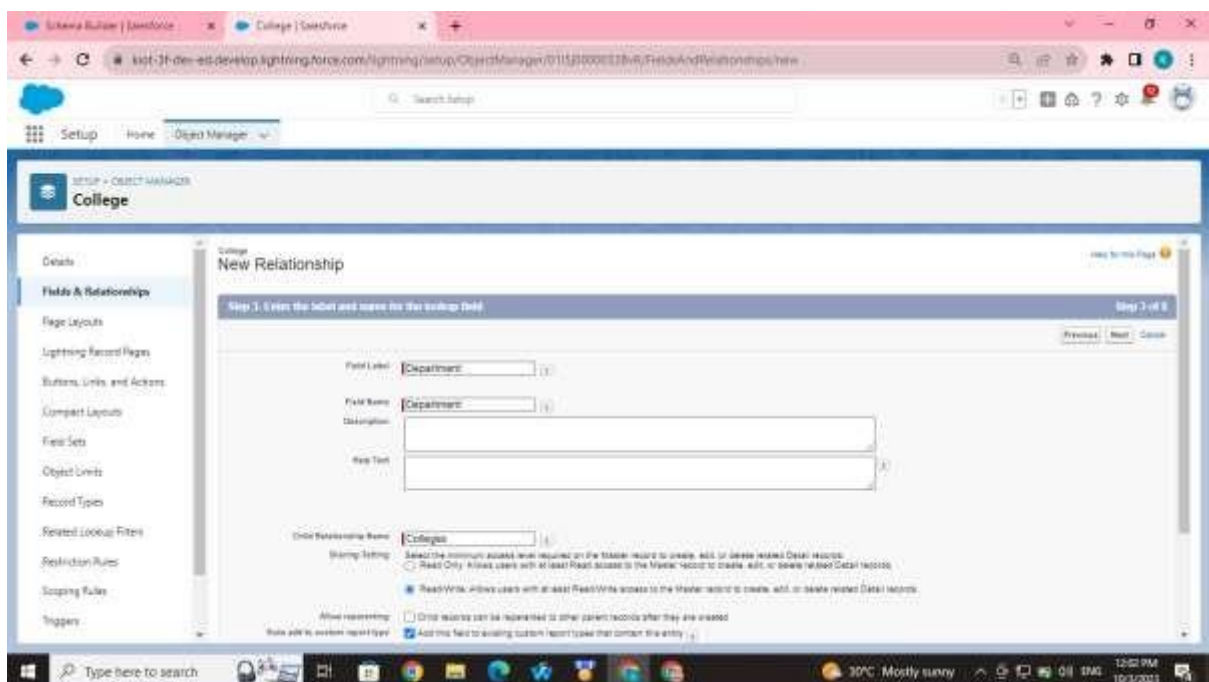

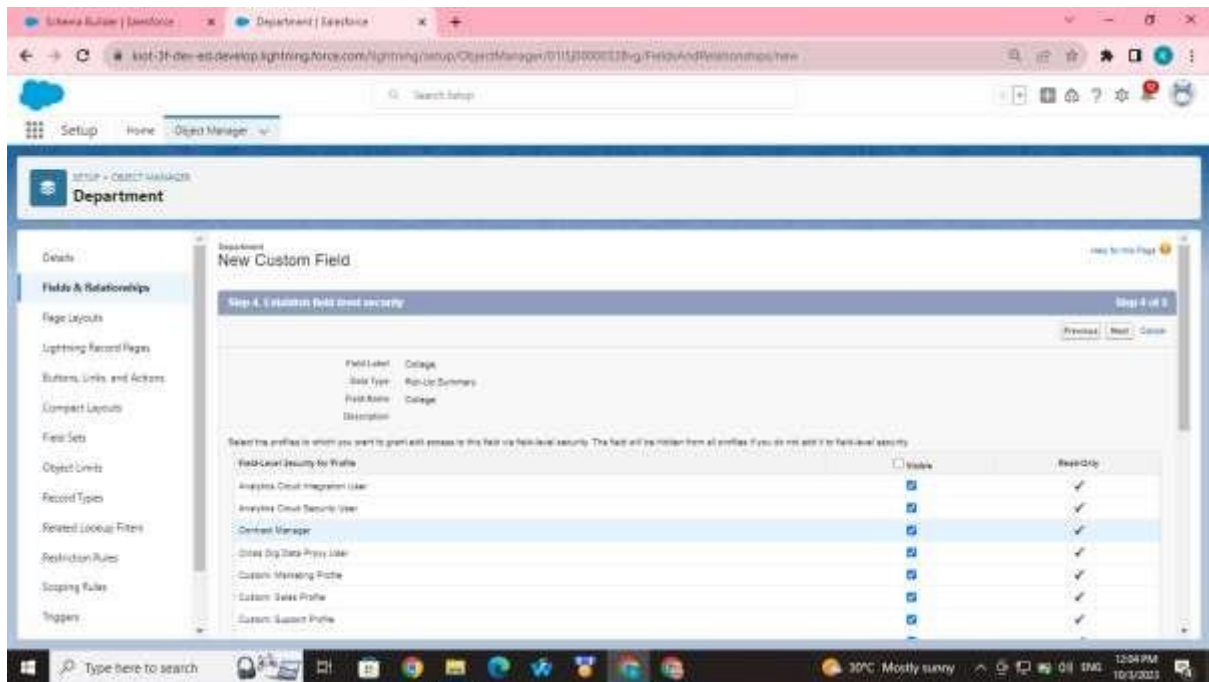

## Step 2: Create a Master-Detail Relationship

To create a Master-Detail relationship between these two custom objects, follow these steps:

1. Go to Setup > Object Manager.
2. Click on "College" to open its settings.
3. In the left sidebar, click on "Fields & Relationships."
4. Click the "New" button to create a new custom field.

5. Choose "Master-Detail Relationship" as the data type.
6. Enter a label for the relationship, e.g., "Department."
7. Choose " Department " as the related object.
8. Configure other settings as needed and click "Next."
9. Specify the field-level security and add it to relevant page layouts.
10. Click "Next" and "Save" to create the relationship.

## Step 3: Create the Roll-Up Summary Field

Now, let's create a Roll-Up Summary Field on the "College" to calculate the total number of related records in "Department":

1. Still on the "College" settings, go to "Fields

**& Relationships."**

- 2. Click the "New" button to create a new custom field.**
- 3. Choose "Roll-Up Summary" as the data type.**
- 4. Enter a label for the field, e.g.,**
- 5. Choose "Count" as the Roll-Up Type.**
- 6. Select " Department" as the object to roll up information from.**
- 7. Specify the filter criteria if you want to filter the related records.**
- 8. Configure other settings as needed and click "Next."**
- 9. Specify the field-level security and add it to relevant page layouts.**
- 10. Click "Next" and "Save" to create the Roll-Up Summary Field.**

2. If there is 2 user, User A and User B in the organisation and we want in Account object that User A should not see the User B Record and user B should not see User A record then apply the Security for the users.

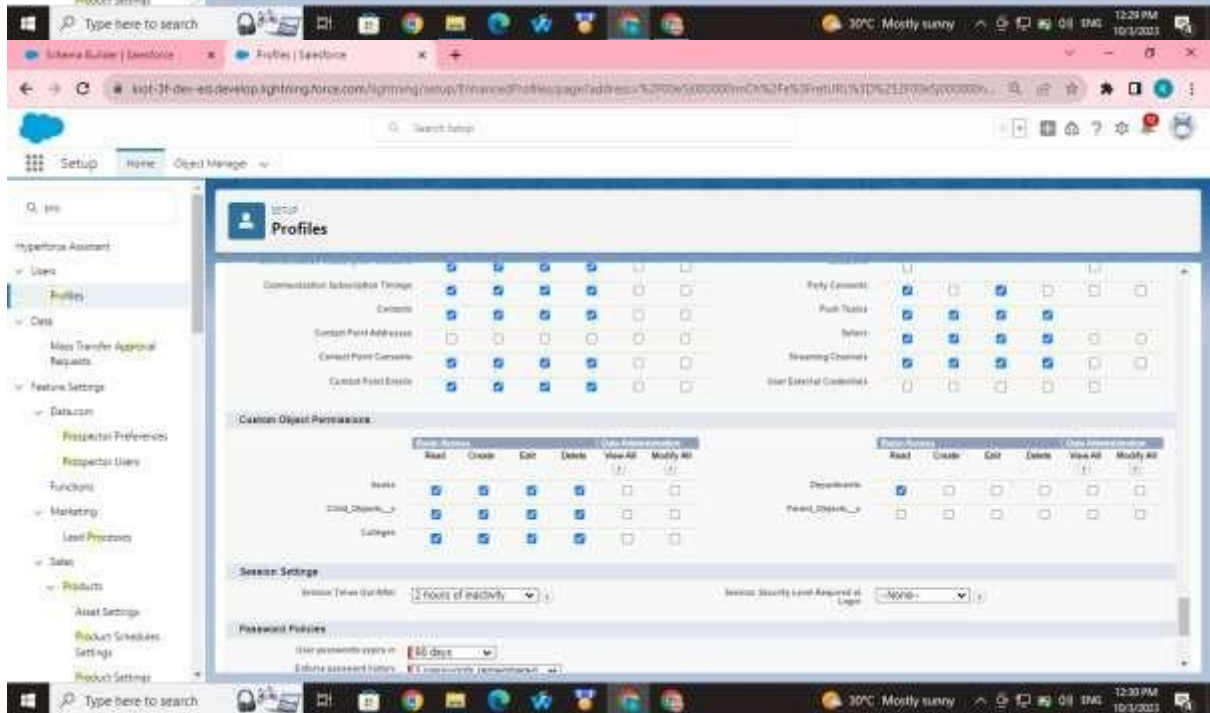

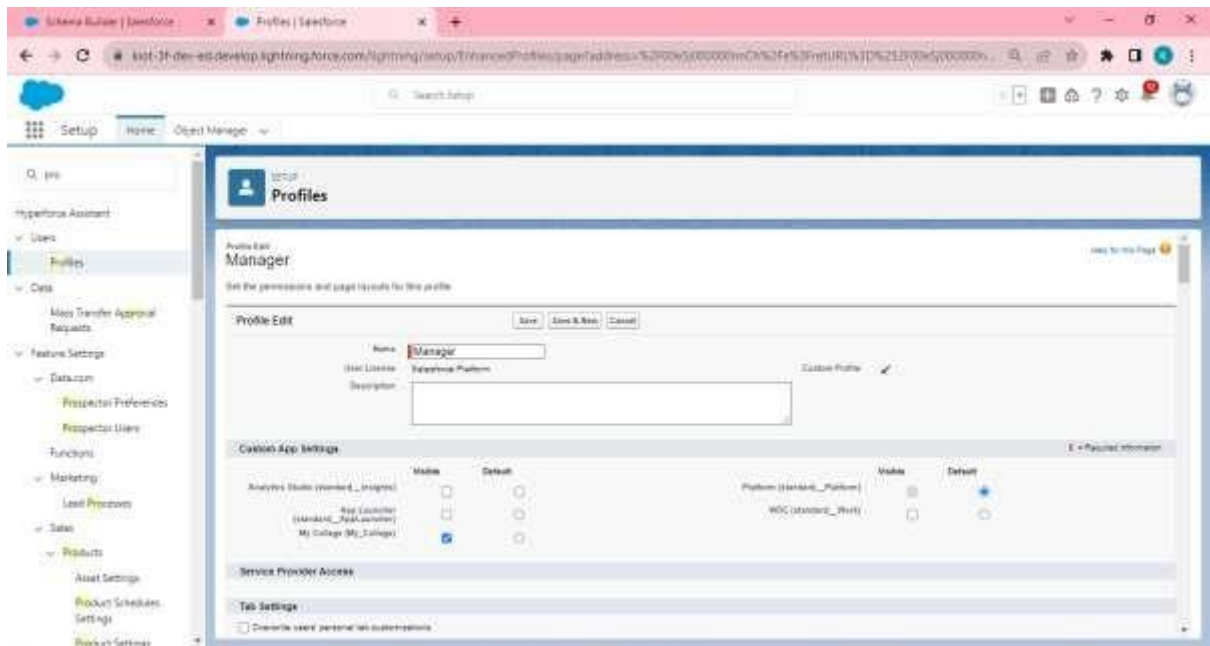

Solution:

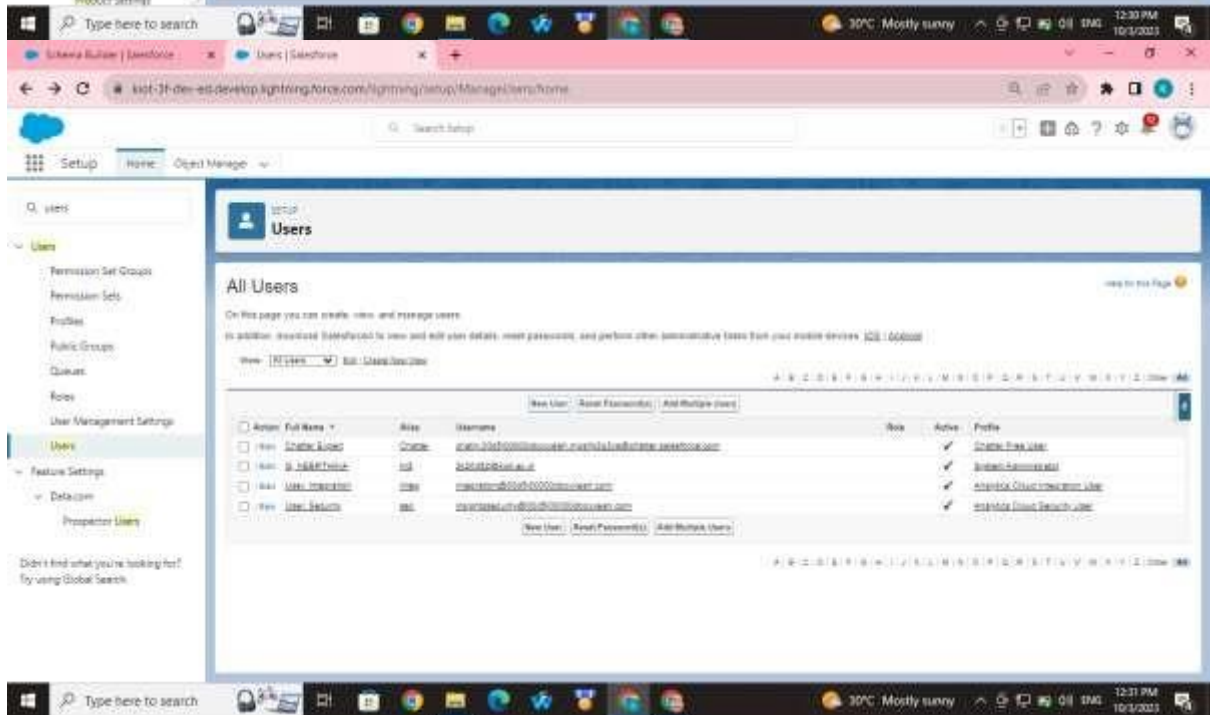

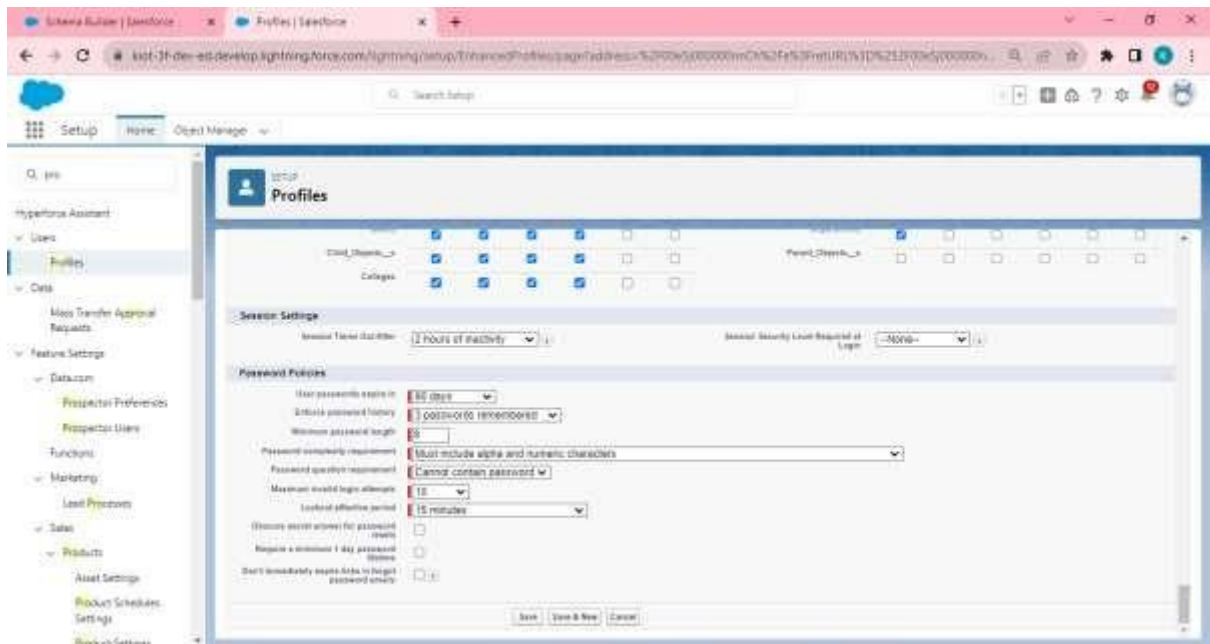

Step 1: Create two separate custom profiles, one for Manager and one for sales manager.

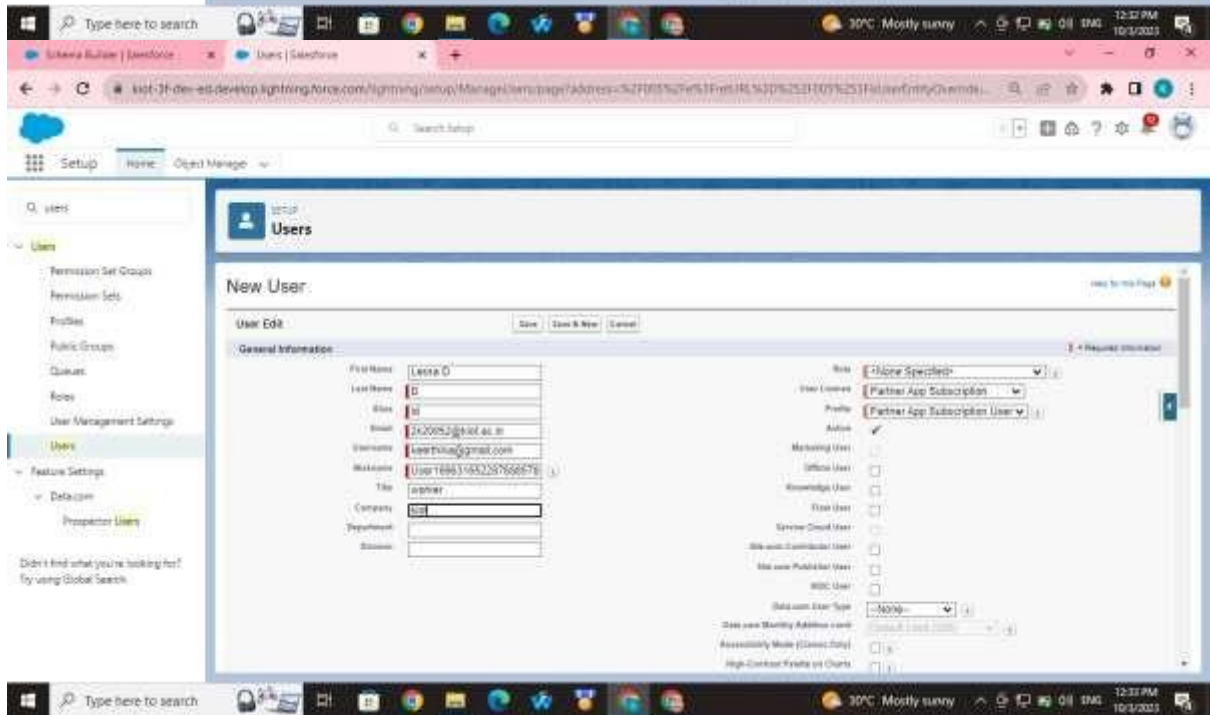

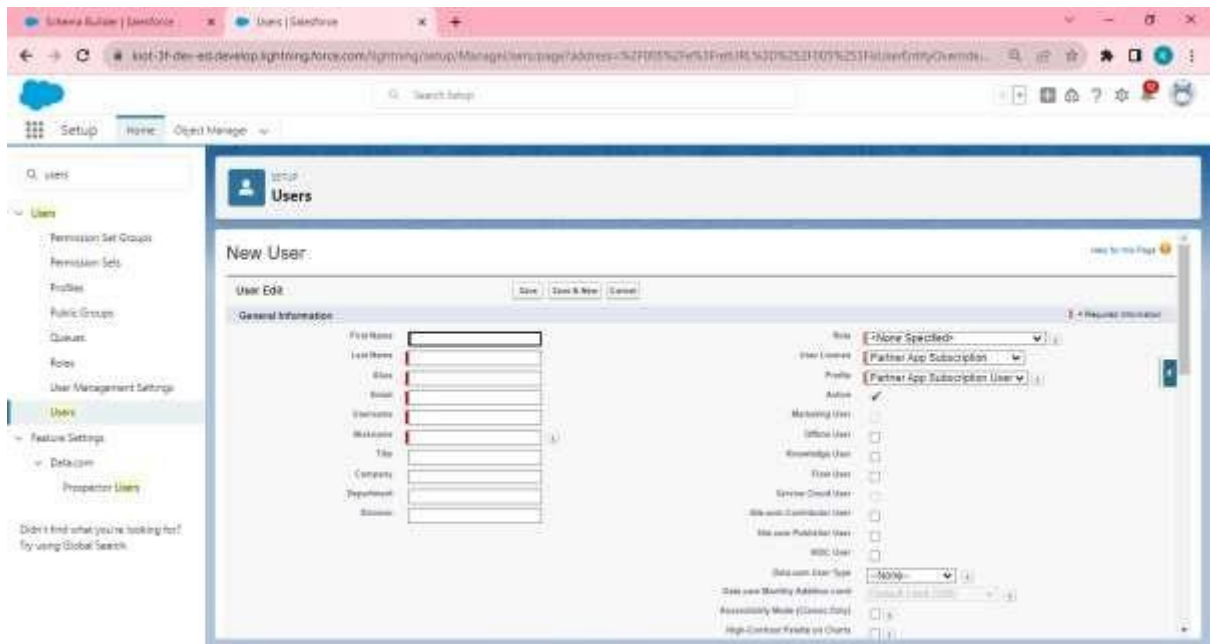

The screenshot shows the Salesforce Lightning Setup interface for a user named Jaya A. The page is titled 'User Detail' and includes a search bar at the top. The user's details are listed on the left, and the role is shown on the right. The role is 'Partner 450 Subscription'. The page also includes a 'User Detail' section with buttons for 'Edit', 'Share', 'Reset Password', and 'Cancel'.

The screenshot shows a Gmail interface with a sidebar on the left containing navigation links like Mail, Chat, Shared, and More. The main area displays an email from 'support@salesforce.com' to 'keerthi@kic.ac.in'. The email content features the Salesforce logo, a 'Welcome to Salesforce!' heading, and instructions to verify the account via a provided link. The email is marked as 'Unread' and 'Important'.

Change Your Password

Enter a new password for **keerthi@klor.ac.in**. Make sure to include at least:

- 8 characters
- 1 letter
- 1 number

Session Times Out After: 2 hours of inactivity

Password Policies

Step 2:

Permission Sets:

- Create two permission sets, one for manager and one for sales manager.

Object-Level Security:

- In each profile and permission set, set the objectlevel security for the Account object to "Read" to ensure that both I-manager and I- sales manager can view Account records.

Record-Level Security:

- Implement record-level security using CriteriaBased Sharing Rules.

- Create a sharing rule that shares Account records owned by manager with manager and records owned by sales manager with sales manager.
- For the sharing rule criteria, specify that records owned by manager are shared with user A, and records owned by sales manager are shared with sales manager. Ownership:
- Ensure that the Account records are owned by the respective users, with manager owning their records and sales manager owning their records.

#### Organization-Wide Defaults:

- Set the organization-wide defaults for the Account object to "Private" to ensure that records are private by default.

#### Testing:

- Test the setup by logging in as manager and sales manager separately to verify that they cannot access each other's records.

Assignment Summary

Full Name	User License	Expires On	Time Zone	Status
admin	Salesforce Platform			Success

Done

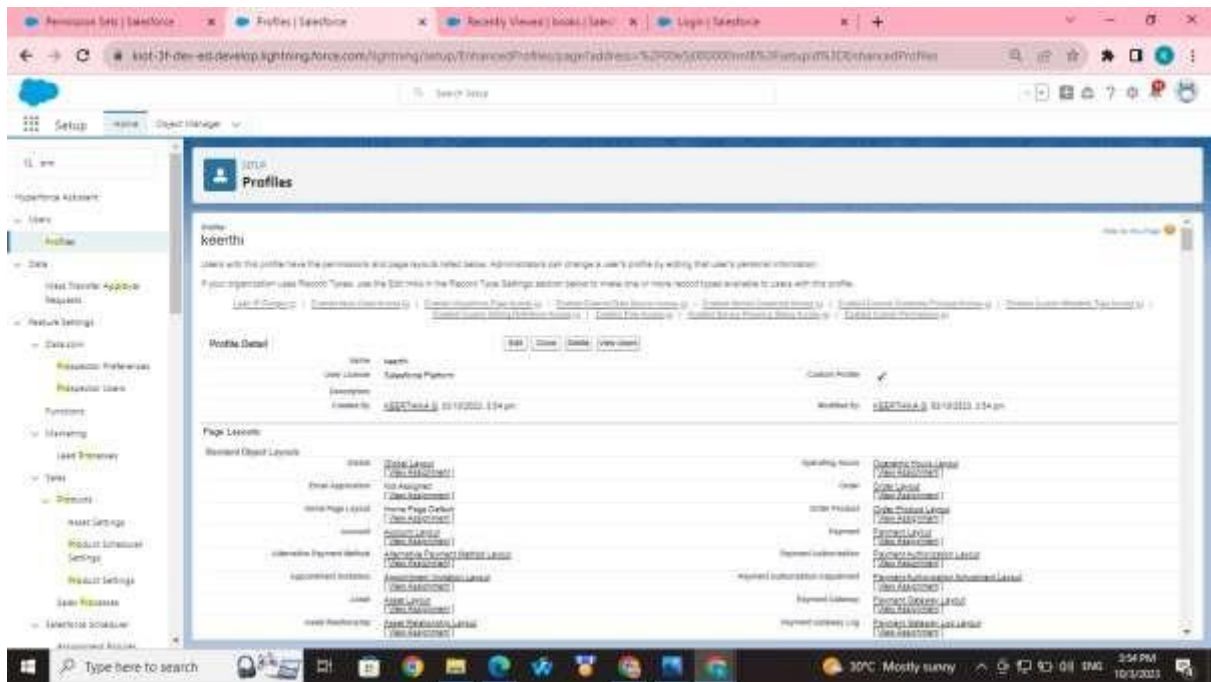

3. Suppose there are 2 Users and they are having Create, Read, Edit access on Account Object with the same profile but we want to open up the access for one user to delete how will you implement the Security setting.

**Solution:**

Step 1: we need create a profile for the two user which has the access to Create, Read, Edit for follow as per.

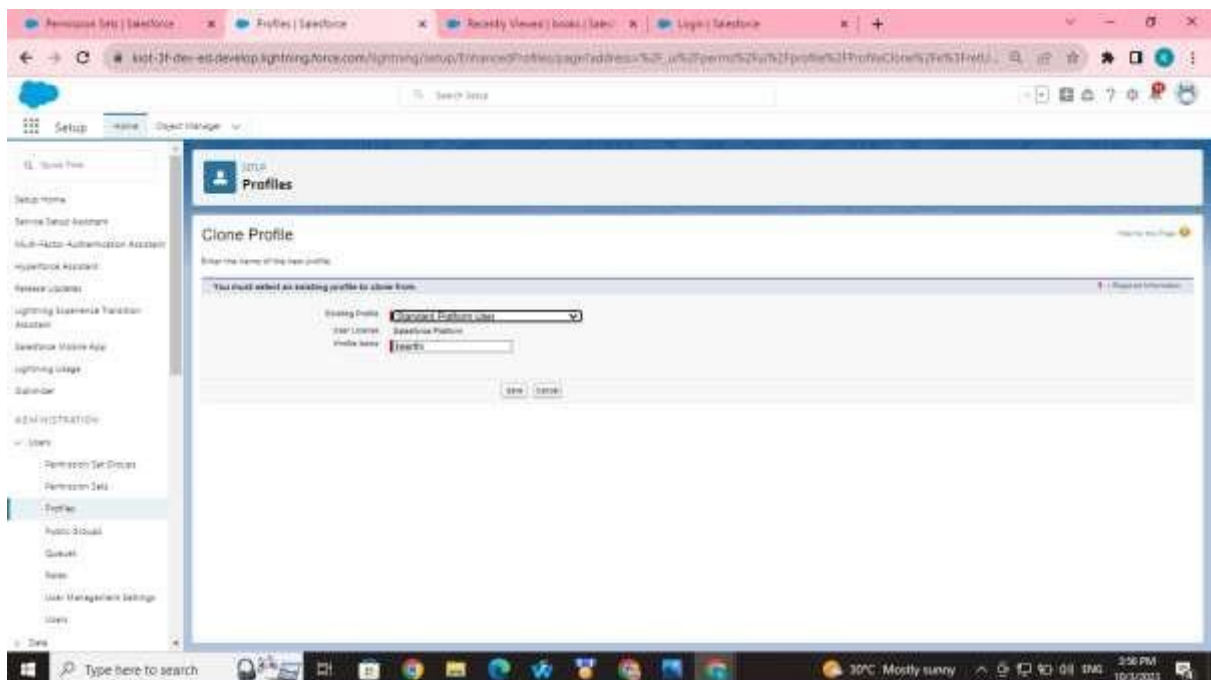

## Setup-quick search[profile]

Step 2:

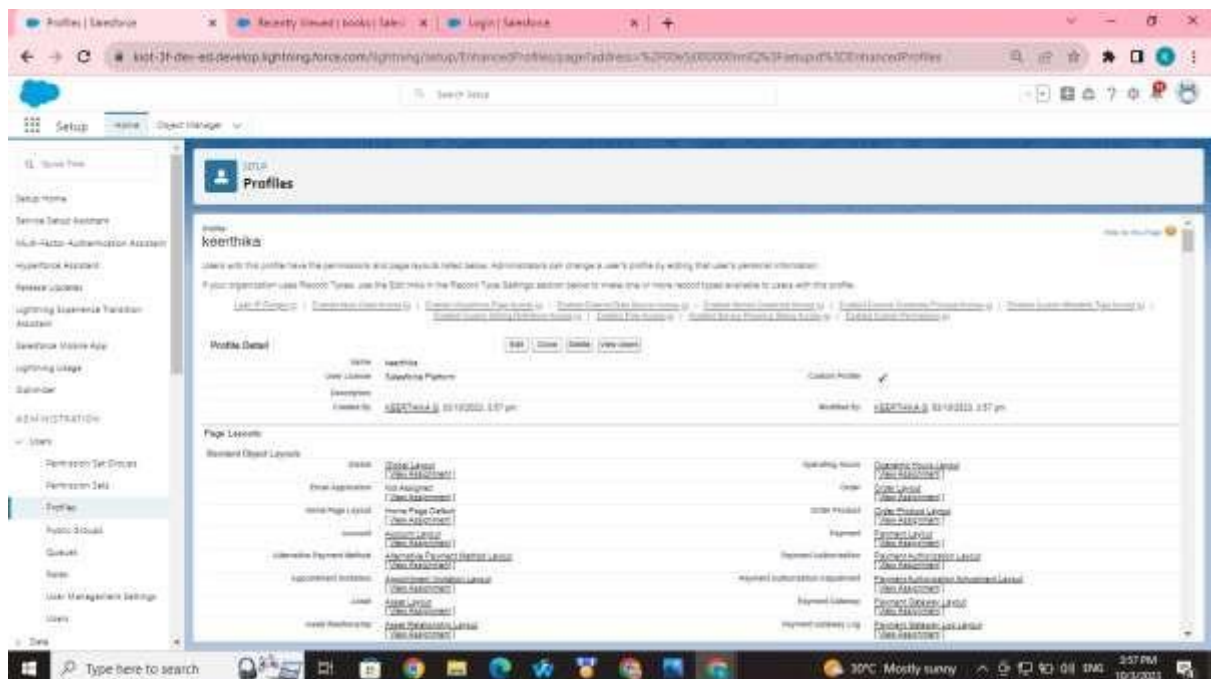

Click on the new to create a new profile along with the label and Api

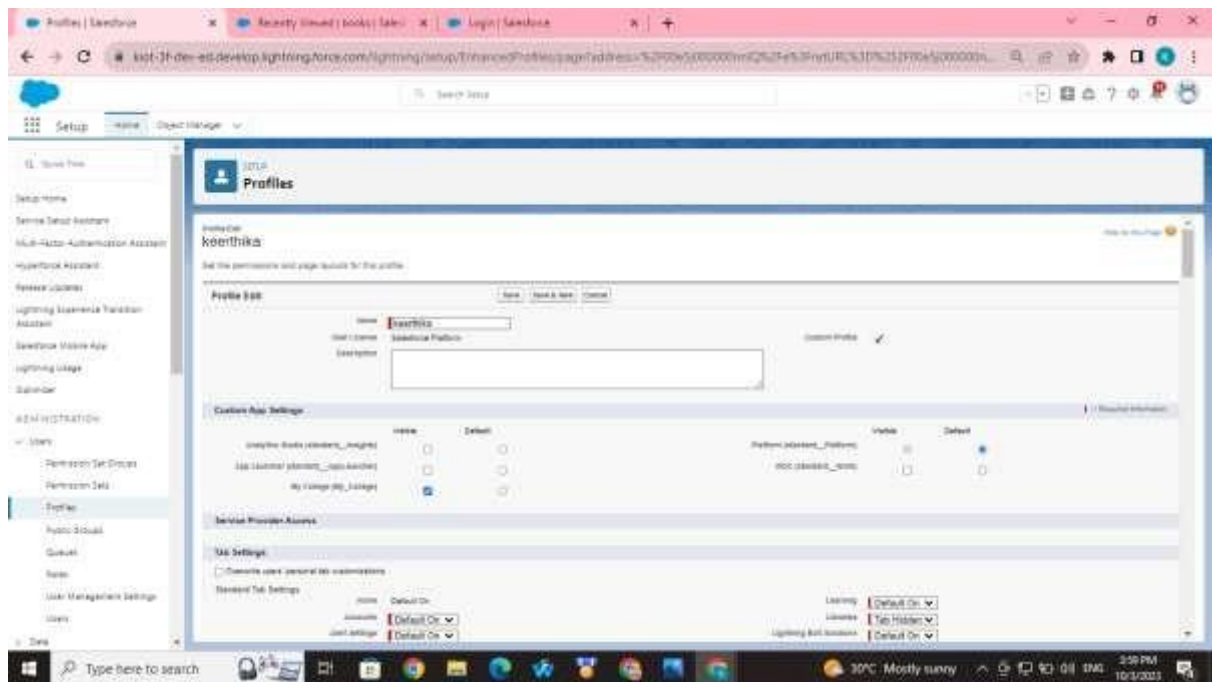

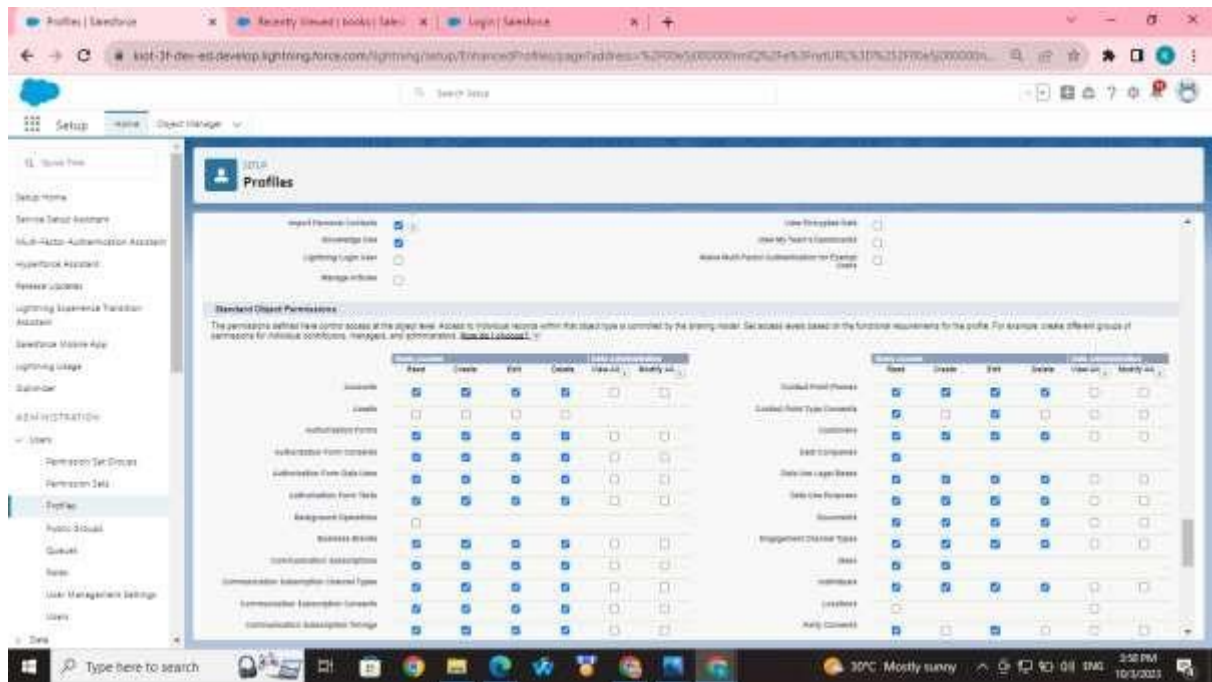

Here I had made it my profile name as Jaga and the existing profile as Standard Platform User.

Step 3:

Now click on the edit and scroll down to custom object settings and enable the read,create,edit and view options. After that click on save.

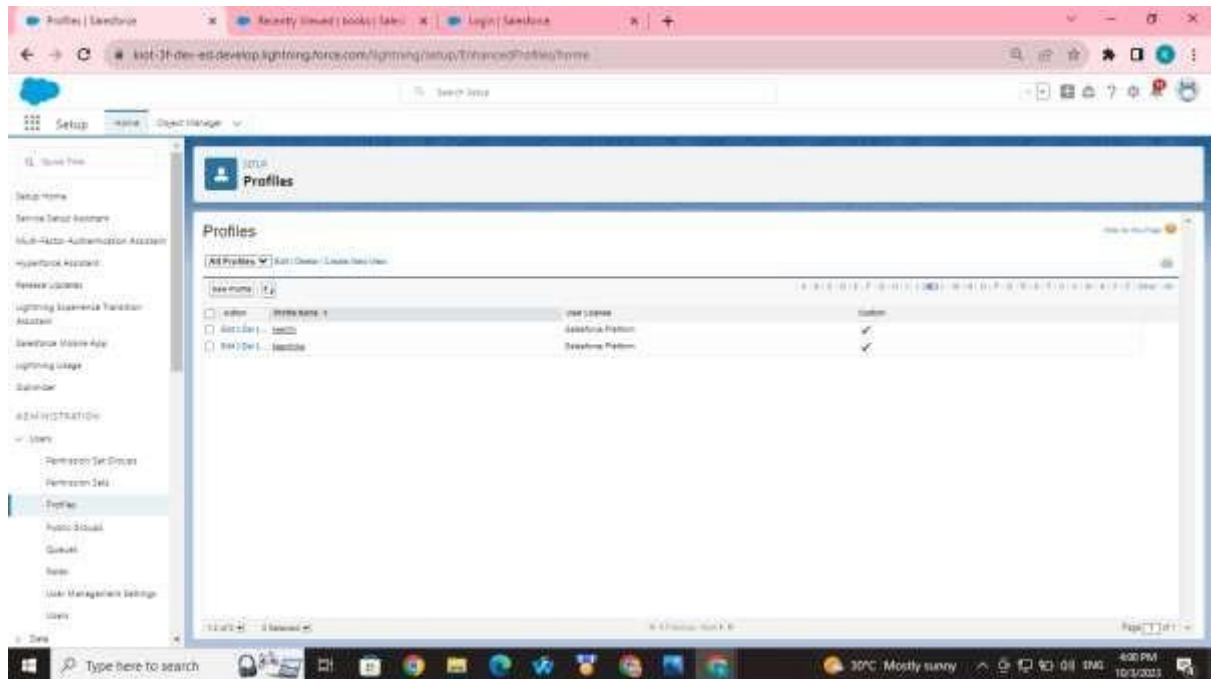

## Step 4

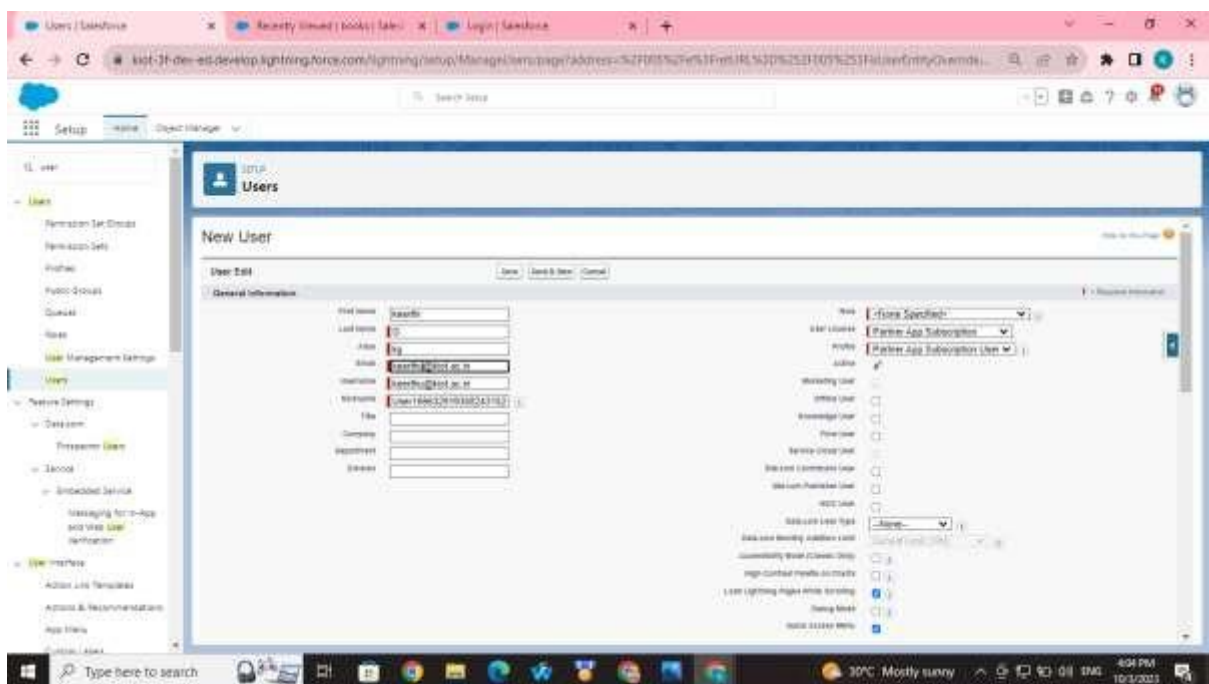

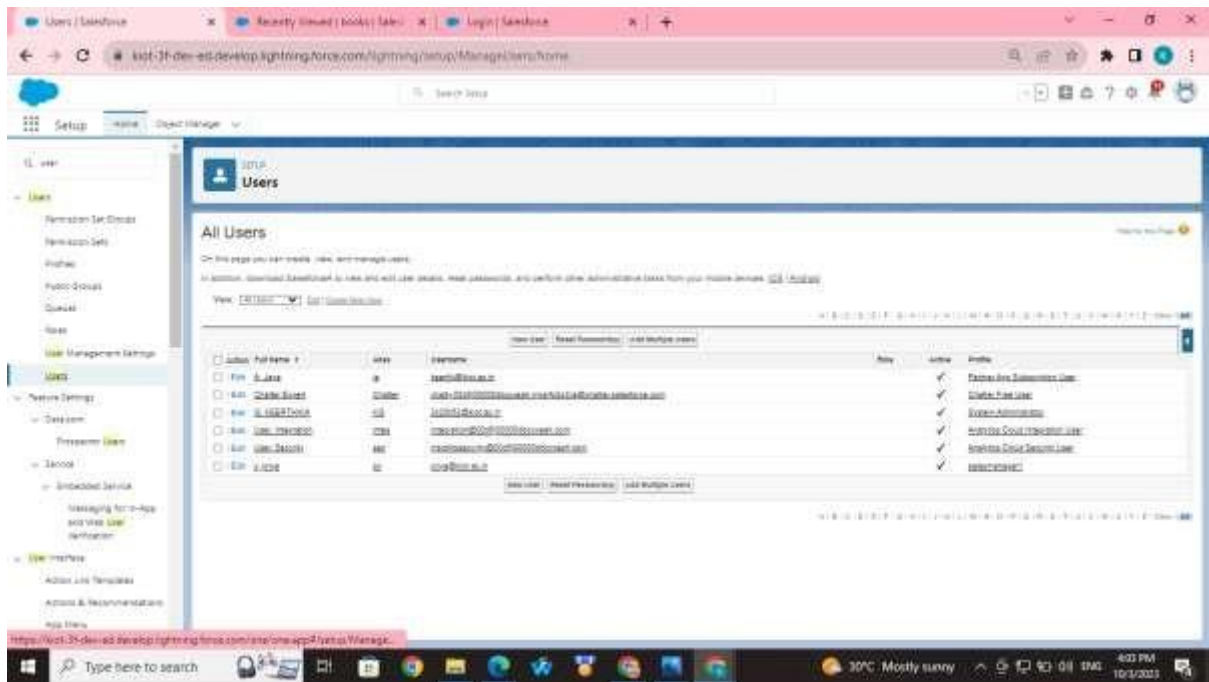

Now you can preview your created profile on the profile option here my profile name jaga has been

created with the access of read,create,edit along with view on it

## Step 5:

Now create two users by enter into the Setup-quick search[user] and then click on new user after clicking that you need to create two user along with the profile as Jaga which we have created on the step 2.once the one user has been created click on the save&new so that you can create the second user and there the user name can been created with alternate name but with the same user profile and once the two user are create click on save.

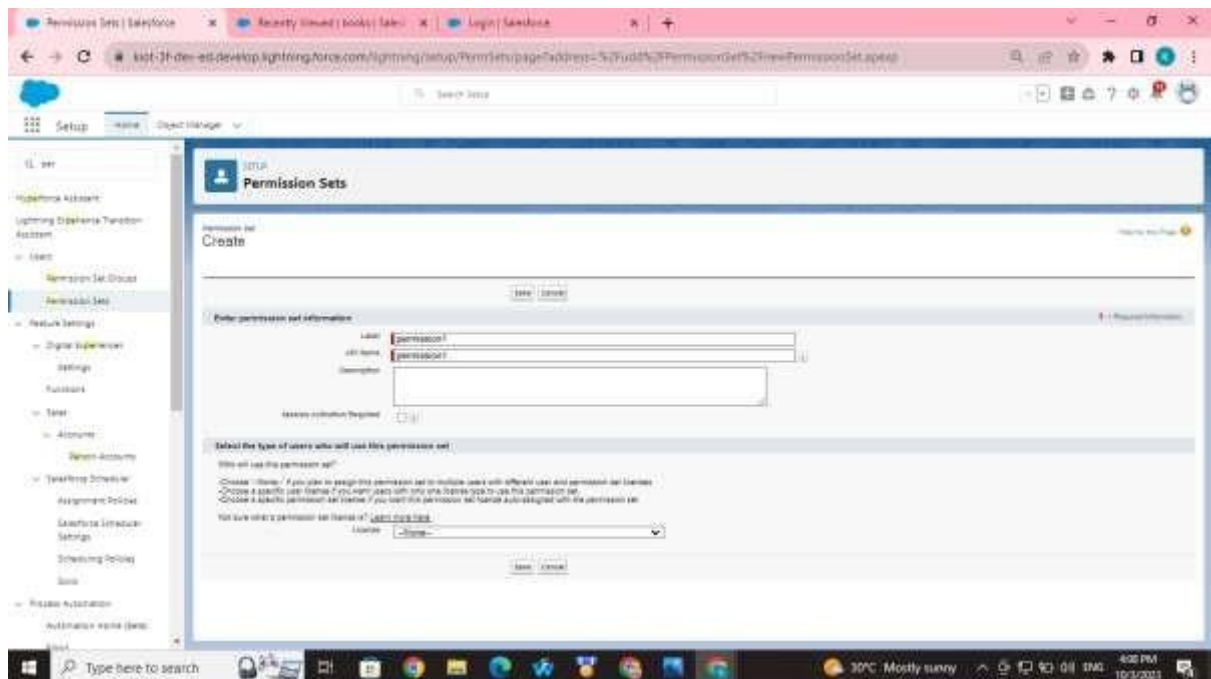

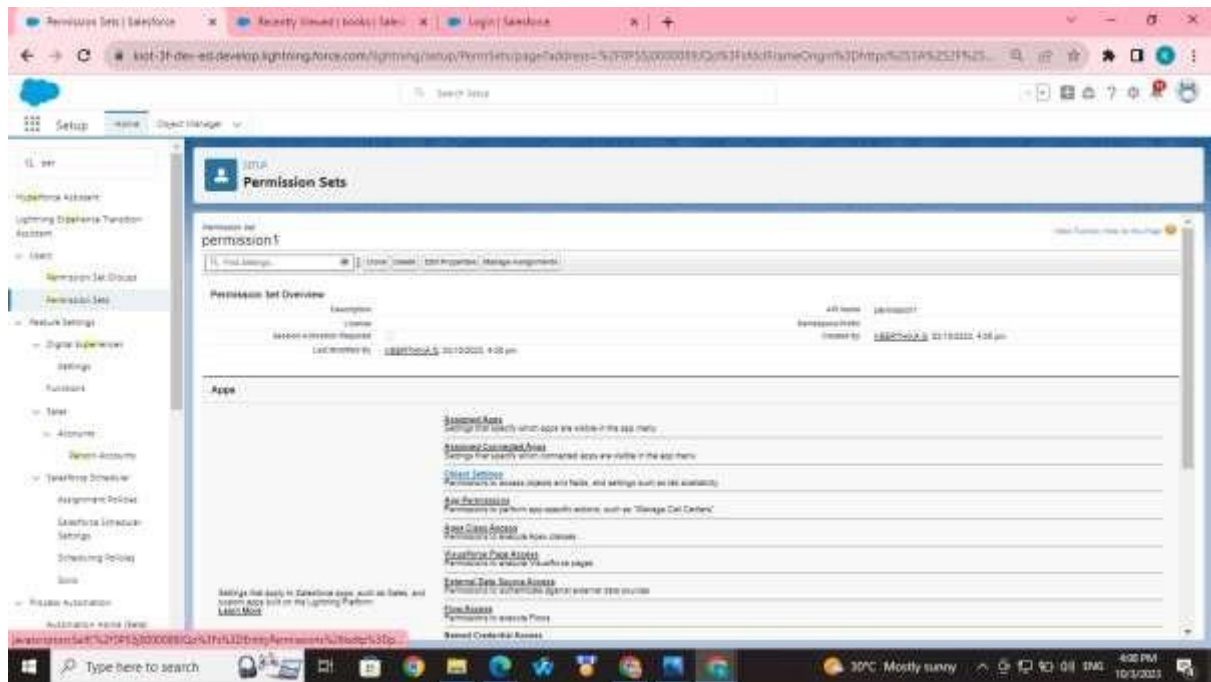

Now you can preview your two user that you have created in my side I had create the two users a Jagadesh11 and Jagadesh22 as a director channel sales with the marketing team.

Step 6:

setup-quick search[permission set]-new-fill label  
name [auto select the API name]-click on  
saveobject settings-accounts.

## Step 7:

Now to give the specific delete access to the user click on edit on the Account and then enable the read,create,edit and the delete on it so that the permission set will have a specific special access on it. once it has been done click on save and then click on manage assignment.

## Step 8

Now click on add assignment there you will find your two created users click on any one user to give a special access as delete on it and then click on assign so that the specific selected user can have a special access as delete on it.

Now click on Assign.

Now the specific access for the Jagadesh11 user has been assigned successfully.

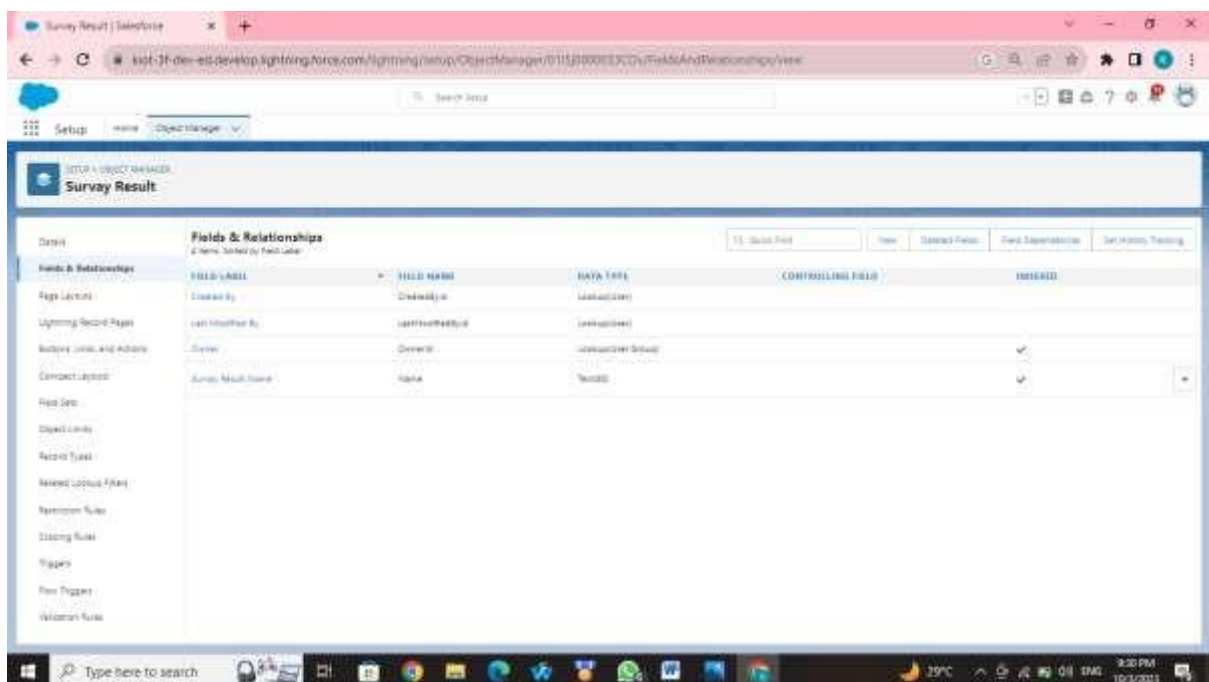

4. Create a screen flow for a basic survey to fill in the details for any form.

Solution:

## Step 1: Create a Custom Object

The next step is to create a custom object **Survey Result** and a few custom fields to store survey responses.

1. Click **Setup**.
2. In the Object Manager, click **Create | Custom Object**.
3. Now create a custom object **Survey Result** and fields as shown in the screenshot below:
4. Click **Save**.

## Step 2: Create a Thank You For Survey Lightning Email Template

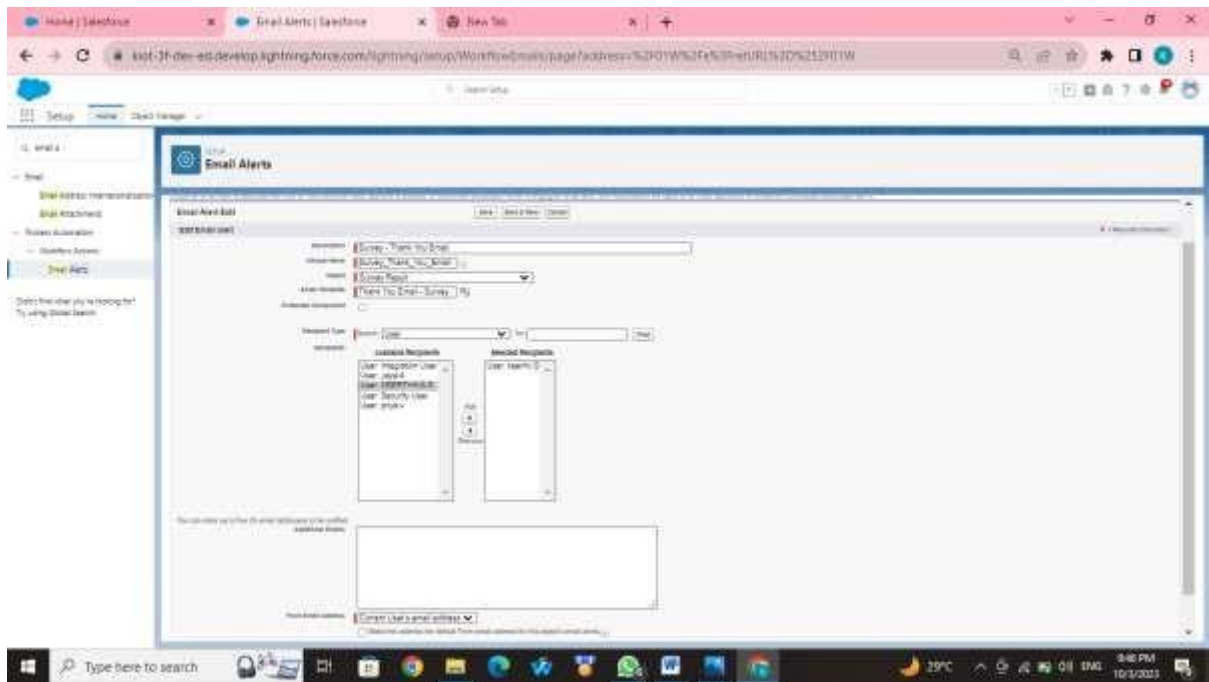

1. Click **App Launcher**.
2. In the Quick Find box, type **Email Templates**.
3. Clicks on the **New Email template** button.
4. Name the **Lightning Email Template** and make sure to store it in the **Public Email Templates** folder.
5. Create a template like the following screenshot.

### Step 3: Create an Email Alert

1. Click **Setup**.
2. In the Quick Find box, type **Email Alerts**.
3. Select **Email Alerts**, click on the **New Email Alert** button.
4. **Name** the **Email Alert** and click the Tab button. The **Unique Name** will populate.
5. For **Object** select **Survey Result**.
6. For the **Email Template** chooses **Lightning Email Template Thank You Email – Survey**.
7. For **Recipient Type** select **Email Field: Email**.
8. Click **Save**.

## Step 4.1: Salesforce Flow — Create a Screen that Allow Users to Fill Survey

1. Click **Setup**.
2. In the Quick Find box, type **Flows**.
3. Select **Flows** then click on the **New Flow**.
4. Select the **Screen Flow** option and click on **Next** and configure the flow as follows:
  1. **How do you want to start building: Freeform**
5. We will use the **Screen** element to capture a **Survey response** form. Drag and drop a **Screen** element onto the canvas.

## Step 4.2: Salesforce Flow — Add a Record

## Creates Element to Save Survey Response

1. Drag-and-drop the **Create Records** element onto the Flow designer.
2. Enter a name in the **Label (Save Response)** field; the **API Name** will autopopulate.
3. For **How Many Records to Create** – select **One**.
4. For **How to Set the Record Fields** – select **Use separate resources, and literal values**.
5. Select the **Survey Result** object from the dropdown list.
6. **Set Field Values for the Survey Result**
  1. Row 1:
    1. **Field: Comment\_\_c**
    2. **Value: {!Comment}** 2. Click **Add Row**
  3. Row 2:
    1. **Field: Email\_\_c**
    2. **Value: {!Email.value}** 4. Click **Add Row**
  5. Row 3:
    1. **Field: Name\_\_c**
    2. **Value: {!Name.firstName}**

**{!Name.lastName}**

6. Click **Add Row**

7. Row 3:

1. **Field:**

**Rating\_\_c**

2. **Value:**

**{!Rating}** 7. Click **Done**.

Edit Create Records

Create Salesforce records using values from the flow:

\* Label: Save Response \* API Name: Save\_Response

Description:

How Many Records to Create:

☒ One ☐ Multiple

How to Set the Record Fields:

☐ Use all values from a record ☒ Use separate resources, and literal values

Create a Record of This Object:

\* Object: Survey Result

Set Field Values for the Survey Result:

Field	Value

Step 4.3: Salesforce Flow — Call an Action — Email Alert to Send Out Thank You Email

The next step is to call the **Survey – Thank You Email** email alert from flow so that when flow

fires it triggers the thank you email to survey participants.

1. Under **Toolbox**, select **Element**.
2. Drag-and-drop **Action** element onto the Flow designer.
3. In the **Action** box, type **Survey – Thank You Email**.
4. Clicks on the **Survey – Thank You Email** email alert.
5. Click **Done**.

The screenshot shows a configuration window titled "Edit 'Survey - Thank You Email' email alert". It contains a text area for a description, a "Set Input Values" section with a "Record ID" field set to "{!Save\_Response}", and "Cancel" and "Done" buttons at the bottom right.

Use values from earlier in the flow to set the inputs for the "Survey - Thank You Email" email alert. To use its outputs later in the flow, store them in variables.

\* Label: Send Thank You Email

\* API Name: Send\_Thank\_You\_Email

Description

Set Input Values

\* Record ID: {!Save\_Response}

Cancel Done

In the end, Sergio's **Flow** will look like the following screenshot:

1. Click **Save**.
2. Enter **Flow Label** the **API Name** will autopopulate.
3. Click **Show Advanced**.
4. **How to Run the Flow: User or System**

**Context—Depends on How Flow is Launched**

5. **Type: Screen Flow**
6. **API Version for Running the Flow:**  
**51**
7. **Interview Label: Survey**  
**{!\$Flow.CurrentDateTime}**
8. Click **Save**.

Step 5: Create a Lightning Application to Render Lightning Runtime for Flow in a Visualforce Page

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

1. Click **Setup | Developer Console**

2. Navigate to **File | New | Lightning Application**
3. Enter a **Name (VFPageToLC)** field, make sure to select the **Lightning Out Dependency App** checkbox.
4. Click **Submit**.
5. Copy code from **GitHub** and paste it into your Lightning Application.
6. **Save** your code.

A screenshot of an IDE window titled 'VFPPageToLC.app'. The code editor shows the following XML code:

```
1 <aura:application access="global"
2     extends="ltng:outApp"
3     implements="ltng:allowGuestAccess">
4     <aura:dependency resource="lightning:flow"/>
5 </aura:application>
```

The IDE has a menu bar with 'File', 'Edit', 'Debug', 'Test', 'Workspace', and 'Help'. At the bottom, there is a blue bar labeled 'Logs, Tests, and Problems'.

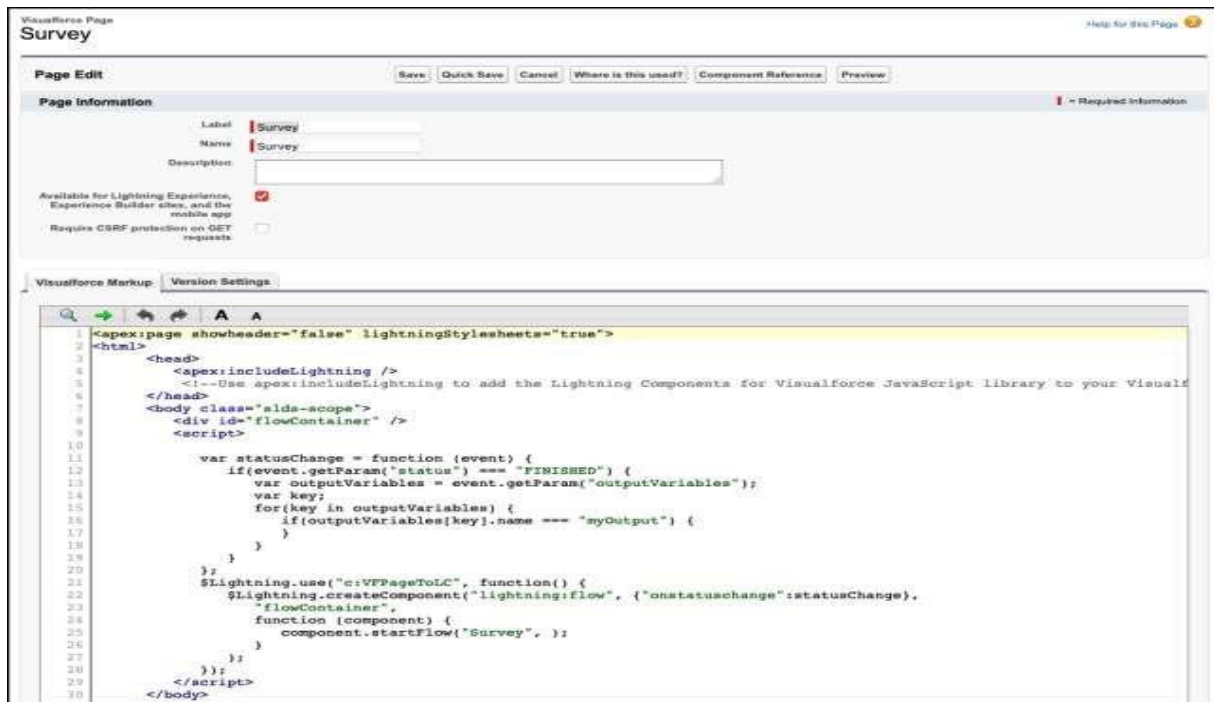

Step 6: Create a Visualforce Page and Embed

## Your Flow Into It

Now we will create a Lightning Application that declares a dependency on the **lightning:flow** component.

Add the Lightning Components for Visualforce JavaScript library to your Visualforce page using the **<apex:includeLightning/>** component. In the Visualforce page, reference the dependency app. Then write a JavaScript function that creates the component on the page using **\$Lightning.createComponent()**

1. Click **Setup**.
2. In the Quick Find box, type **Visualforce Pages**.
3. Clicks on the **New** button.
4. Copy code from **GitHub** and paste it into your visualforce page
5. Click **Save**.

## Step 7: Create a Force.com Site to Open Your Flow for Unauthenticated Access

Now we will create a site to open the flow for unauthenticated access.

1. Click **Setup**.
2. In the Quick Find box, type **Sites**.
3. Clicks on the **New** button.
4. Fill the details as per the screenshot below:
5. Click **Save**.

to me

8:09 PM (1 minute ago)   

Hi Alok Sinfal,

Thanks for taking time out to participate in our survey. We are very appreciative of the time you have taken to assist in our analysis, and commit to utilizing the information gained to contemplate and implement worthwhile improvements. We will share these results with you through your State Survey Agency, whom we also thank for their generous participation.

Once again, we are extremely grateful for your contributing your valuable time, your honest information, and your thoughtful suggestions.

Thanks,  
Automation Champion
